

# **Maths Written Calculation Policy**

**“Every Child,  
Every Chance,  
Every Day”**

**Written by: Matt Jones**

Every Child, Every Chance, Every Day

## **St Marks CE Primary School** **Policy for Maths written calculation**

As children progress through the school they will need to develop ways of recording to support their mental calculation and thinking.

The intention of this policy is to ensure that:

*'By the end of Y6, children are equipped with mental, written and calculator methods that they can understand and use correctly'*

*(Primary Framework, Guidance Paper, Calculation)*

It is organised into year groups so that teachers can use the document to support their planning and delivery of lessons and parents can identify what their children should be using for homework. Mental calculation will continue to be used; written calculations are not a substitute for this. Mental calculation will be addressed at the beginning of every lesson and during an additional discrete lesson once a day.

The policy will be monitored during the Maths book and planning monitoring cycle to ensure written calculations are being taught as the policy sets out.

The policy intends to be for practical use by class teachers every day, therefore is in a summary format. It will also be shared with teaching assistants and parents. If further information is required, this can be found in the Primary Framework guidance paper and Cambridge Education at Islington Calculation Policy documents from the Maths Subject Leader.

A selection of mental calculation strategies that need to be taught through discrete mental maths lesson every day, throughout the school.

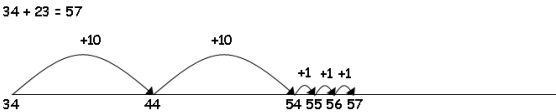

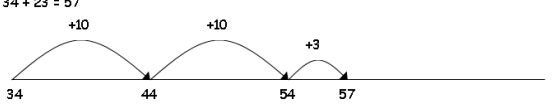

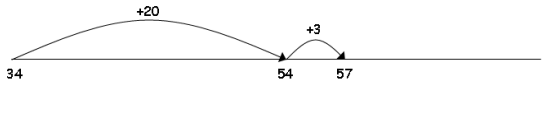

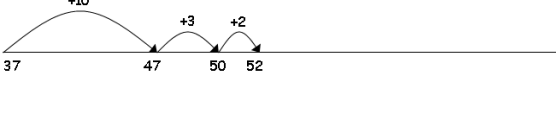

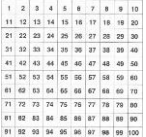

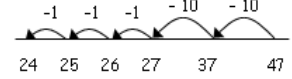

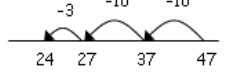

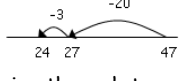

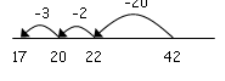

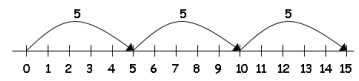

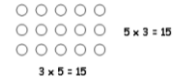

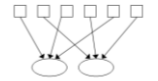

<b>Addition</b>	<p><b>Mental recall of number bonds</b></p> $6 + 4 = 10$ $25 + 75 = 100$ $\square + 3 = 10$ $19 + \square = 20$ <p><b>Use near doubles</b></p> $7 + 8 = \text{double } 7 + 1 = 15$ <p><b>Addition using partitioning and recombining</b></p> $43 + 54 = (40 + 50) + (3 + 4) = 97$ <p><b>Counting on or back in repeated steps of 1, 10, 100, 1000</b></p> $86 + 57 = 143 \text{ (by counting on in tens and then in ones)}$ $460 + 320 = 780 \text{ (by counting on in hundreds then in tens)}$ <p><b>Add the nearest multiple of 10, 100 and 1000 and adjust</b></p> $24 + 19 = 24 + 20 - 1 = 43$ $458 + 71 = 458 + 70 + 1 = 529$ <p><b>Use the relationship between addition and subtraction</b></p> $36 + 19 = 55$ $19 + 36 = 55$ $55 - 19 = 36$ $55 - 36 = 19$
<b>Subtraction</b>	<p><b>Mental recall of addition and subtraction facts</b></p> $10 - 6 = 4$ $20 - 17 = 3$ $17 - \square = 11$ $10 - \square = 2$ <p><b>Find a small difference by counting up</b></p> $82 - 79 = 3$ <p><b>Counting on or back in repeated steps of 1, 10, 100, 1000</b></p> $86 - 52 = 34 \text{ (by counting back in tens and then in ones)}$ $460 - 300 = 160 \text{ (by counting back in hundreds)}$ <p><b>Subtract the nearest multiple of 10, 100 and 1000 and adjust</b></p> $24 - 19 = 24 - 20 + 1 = 5$

	$458 - 71 = 458 - 70 - 1 = 387$  <b>Use the relationship between addition and subtraction</b> $36 + 19 = 55$ $19 + 36 = 55$ $55 - 19 = 36$ $55 - 36 = 19$
<b>Multiplication</b>	<p><b>Doubling and halving</b> Applying the knowledge of doubles and halves to known facts. e.g. <math>8 \times 4</math> is double <math>4 \times 4</math></p> <p><b>Using multiplication facts</b> <i>Tables should be taught everyday from Y2 onwards, either as part of the mental oral starter or other times as appropriate within the day.</i></p> <p><b>Year 1</b>              Count on or back in 1s, 2s, 5s and 10s and use this knowledge to derive the multiples of 2,5 and 10 to the tenth multiple. Recall the doubles of all numbers to at least 10.</p> <p><b>Year 2</b> Pupils should be taught to derive and recall multiplication facts for:                         2 times table                         5 times table                         10 times table</p> <p><b>Year 3</b> Pupils should be taught to derive and recall multiplication facts for:                         2 times table                         3 times table                         4 times table                         6 times table                         5 times table                         10 times table</p> <p><b>Year 4</b> Pupils should be taught to derive and recall multiplication facts for:                         All tables up to <math>10 \times 10</math></p> <p><b>Year 5</b>              Recall quickly multiplication facts up to <math>10 \times 10</math> and use them to multiply pairs of multiples of 10 and 100</p>

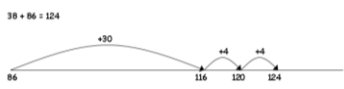

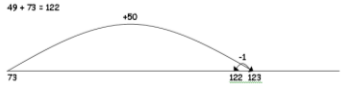

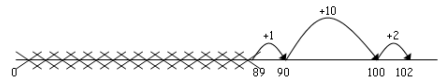

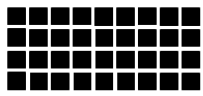

<b>Division</b>	<p><b>Doubling and halving</b> Knowing that halving is dividing by 2</p> <p><b>Deriving division facts</b> <i>Tables should be taught everyday from Y2 onwards, either as part of the mental oral starter or other times as appropriate within the day.</i></p> <p><b>Year 1</b>          Count on and back in twos, fives and tens</p> <p><b>Year 2</b> Derive the related division facts for the:                         2 times table                         5 times table                         10 times table</p> <p><b>Year 3</b> Derive the related division facts for the:                         2 times table                         3 times table                         4 times table                         5 times table                         6 times table                         10 times table</p> <p><b>Year 4</b> Derive the related division facts for multiplication facts up to <math>10 \times 10</math>.</p> <p><b>Year 5</b> Derive <i>quickly</i> division facts up to <math>10 \times 10</math></p> <p><b>Year 6</b>          Use knowledge of multiplication and division facts to derive division facts involving decimals (e.g. <math>4.8 \div 6</math>).</p> <p><b>Using and applying division facts</b> Children should be able to utilise their tables knowledge to derive other facts. e.g. If I know <math>24 \div 6 = 4</math>, what else do I know?  <math>240 \div 6 = 40</math> , <math>2400 \div 6 = 400</math>, <math>24000 \div 6 = 4000</math>, <math>2.4 \div 6 = 0.4</math> etc</p> <p><b>Dividing by 10 or 100</b> Knowing that the effect of dividing by 10 is a shift in the digits one place to the right. Knowing that the effect of dividing by 100 is a shift in the digits two places to the right.</p> <p><b>Use of factors</b>  <math>378 \div 21</math>          <math>378 \div 3 = 126</math>          <math>378 \div 21 = 18</math>                                 <math>126 \div 7 = 18</math></p> <p><b>Use related facts</b> Given that <math>1.4 \times 1.1 = 1.54</math> What is <math>1.54 \div 1.4</math>, or <math>1.54 \div 1.1</math>?</p>
-----------------	---

	addition	subtraction	multiplication	division
RECEPTION	<p>Children are encouraged to develop a mental picture of the number system in their heads to use for calculation.</p> <p>They develop ways of recording calculations using pictures, etc.</p>  <p>Bead strings or bead bars can be used to illustrate addition</p>  $8+2=10$ <p>They use number lines and practical resources to support calculation and teachers <i>demonstrate</i> the use of the number line.</p>	<p>Children are encouraged to develop a mental picture of the number system in their heads to use for calculation.</p> <p>They develop ways of recording calculations using pictures etc.</p>  <p>Bead strings or bead bars can be used to illustrate subtraction including bridging through ten by counting back 3 then counting back 2.</p>  $6-2=4$ <p>They use number lines and practical resources to support calculation. Teachers <i>demonstrate</i> the use of the number line.</p>	<p>Children will experience equal groups of objects.</p> <p>They will count in 2s and 10s and begin to count in 5s.</p> <p>They will work on practical problem solving activities involving equal sets or groups.</p> 	<p>Children will understand equal groups and share items out in play and problem solving. They will count in 2s and 10s and later in 5s.</p> 

YEAR ONE	<div data-bbox="165 49 273 84" data-label="Section-Header"> <h2>addition</h2> </div> <div data-bbox="165 97 353 129" data-label="Section-Header"> <h3>Using pictures</h3> </div> <div data-bbox="165 129 340 189" data-label="Image"> </div> <div data-bbox="161 231 665 378" data-label="Text"> <p><b>Bead strings or bead bars</b> can be used to illustrate addition including bridging through ten by counting on 2 then counting on 3.</p> </div> <div data-bbox="174 419 589 451" data-label="Image"> </div> <div data-bbox="161 491 636 636" data-label="Text"> <p>They use number lines and practical resources to support calculation and teachers <i>demonstrate</i> the use of the number line.</p> </div> <div data-bbox="161 678 685 790" data-label="Text"> <p>Children then begin to use <b>numbered lines</b> to support their own calculations using a numbered line to count on in ones.</p> </div> <div data-bbox="161 828 454 863" data-label="Text"> <p>work out mentally that</p> </div> <div data-bbox="161 865 405 1008" data-label="Equation-Block"> <math display="block">  \begin{aligned}  5+8 &amp;= 5 + (5 \text{ and } 3) \\  &amp;= 5 + 5 + 3 \\  &amp;= 10 + 3 \\  &amp;= 13  \end{aligned}  </math> </div> <div data-bbox="174 1051 430 1142" data-label="Figure"> </div> <div data-bbox="161 1190 584 1299" data-label="Figure"> </div>	<div data-bbox="714 49 866 84" data-label="Section-Header"> <h2>subtraction</h2> </div> <div data-bbox="714 97 904 129" data-label="Section-Header"> <h3>Using pictures</h3> </div> <div data-bbox="714 129 920 215" data-label="Image"> </div> <div data-bbox="710 255 1205 402" data-label="Text"> <p><b>Bead strings or bead bars</b> can be used to illustrate subtraction including bridging through ten by counting back 3 then counting back 2.</p> </div> <div data-bbox="716 442 1207 475" data-label="Image"> </div> <div data-bbox="710 513 1193 660" data-label="Text"> <p>Children then begin to use numbered lines to support their own calculations - using a numbered line to count back in ones.</p> </div> <div data-bbox="710 700 1207 924" data-label="Text"> <p>The <b>number line</b> should also be used to show that 6 - 3 means the 'difference between 6 and 3' or 'the difference between 3 and 6' and how many jumps they are apart.</p> </div> <div data-bbox="710 963 1180 1034" data-label="Text"> <p>Symbolic representations: How many less?</p> </div> <div data-bbox="723 1051 958 1098" data-label="Equation-Block"> <math display="block">\square \square \square - \square = \square \square</math> </div> <div data-bbox="716 1115 1034 1171" data-label="Equation-Block"> <math display="block">\bigcirc \bigcirc \bigcirc \bigcirc \bigcirc - \bigcirc \bigcirc = \boxed{3}</math> </div> <div data-bbox="710 1185 831 1217" data-label="Equation-Block"> <math display="block">8 - 3 = 5</math> </div> <div data-bbox="716 1240 1160 1287" data-label="Figure"> </div>	<div data-bbox="1229 49 1402 84" data-label="Section-Header"> <h2>multiplication</h2> </div> <div data-bbox="1223 94 1603 165" data-label="Text"> <p>Children will experience equal groups of <b>objects</b>.</p> </div> <div data-bbox="1223 204 1641 276" data-label="Text"> <p>They will count in 2s and 10s and begin to count in 5s.</p> </div> <div data-bbox="1223 316 1675 426" data-label="Text"> <p>They will work on practical problem solving activities involving equal sets or groups.</p> </div> <div data-bbox="1229 429 1386 547" data-label="Image"> </div> <div data-bbox="1223 587 1471 624" data-label="Text"> <p>Initially <b>pictorially</b></p> </div> <div data-bbox="1223 625 1433 657" data-label="Equation-Block"> <math display="block">2 + 2 + 2 + 2 = 8</math> </div> <div data-bbox="1223 663 1346 695" data-label="Equation-Block"> <math display="block">2 \times 4 = 8</math> </div> <div data-bbox="1223 700 1449 735" data-label="Equation-Block"> <math display="block">4 \text{ groups of } 2 = 8</math> </div> <div data-bbox="1223 738 1520 772" data-label="Equation-Block"> <math display="block">2 \text{ multiplied four times}</math> </div> <div data-bbox="1223 775 1554 810" data-label="Equation-Block"> <math display="block">2 \text{ groups of } 3: \text{ using story}</math> </div> <div data-bbox="1223 813 1671 885" data-label="Text"> <p>sentences e.g. 2 bags with 3 apples each, practical activities</p> </div> <div data-bbox="1283 888 1469 920" data-label="Text"> <p>column <math>\times</math> row</p> </div> <div data-bbox="1223 927 1386 1086" data-label="Equation-Block"> <math display="block">  \begin{array}{c}  \bullet \bullet \\  \bullet \bullet \\  \bullet \bullet \\  4 \times 2 \bullet \bullet \bullet \bullet \\  \bullet \bullet \bullet \bullet  \end{array}  </math> </div> <div data-bbox="1332 1094 1413 1125" data-label="Equation-Block"> <math display="block">2 \times 4</math> </div> <div data-bbox="1223 1129 1536 1165" data-label="Text"> <p><b>Number tracks &amp; ----------	--	--	---	---

YEAR TWO	<div>addition</div> <div>Empty number lines</div> <p>Children will begin to use 'empty number lines' themselves starting with the larger number and counting on.</p> <p>✓ First <b>counting on</b> in tens and ones.</p> <p><math>34 + 23 = 57</math></p>  <p>✓ Then helping children to become more efficient by adding the units in one jump (by using the known fact <math>4 + 3 = 7</math>).</p> <p><math>34 + 23 = 57</math></p>  <p>✓ Followed by adding the tens in one jump and the units in one jump.</p> <p><math>34 + 23 = 57</math></p>  <p>✓ Bridging through ten can help children become more efficient.</p> <p><math>37 + 15 = 52</math></p>  <p>Use of a hundred square to support calculation</p>  <p>Begin to develop use of <b>partitioning</b> when using number lines</p>	<div>subtraction</div> <div>Empty number lines</div> <p>Children will begin to use empty number lines to support calculations.</p> <p><b>Counting back:</b></p> <p>✓ First counting back in tens and ones.</p> <p><math>47 - 23 = 24</math></p>  <p>✓ Then helping children to become more efficient by subtracting the units in one jump (by using the known fact <math>7 - 3 = 4</math>).</p> <p><math>47 - 23 = 24</math></p>  <p>✓ Subtracting the tens in one jump and the units in one jump.</p> <p><math>47 - 23 = 24</math></p>  <p>✓ Bridging through ten can help children become more efficient.</p> <p><math>42 - 25 = 17</math></p>  <p><b>Counting on:</b></p> <p>The number line should still show 0 so children can cross out the section from 0 to the smallest number. They then associate this method with 'taking away'.</p>	<div>multiplication</div> <p>Children will develop their understanding of multiplication and use jottings to support calculation:</p> <p><b>Repeated addition</b></p> <p>3 times 5 is <math>5 + 5 + 5 = 15</math> or 3 lots of 5 or <math>5 \times 3</math></p> <p>Repeated addition can be shown easily on a number line:</p>  <p>and on a bead bar:</p> <p><math>5 \times 3 = 5 + 5 + 5</math></p>  <p><b>Commutative</b></p> <p>Children should know that <math>3 \times 5</math> has the same answer as <math>5 \times 3</math>. This can also be shown on the number line.</p>  <p><b>Arrays</b></p> <p>Children should be able to model a multiplication calculation using an array. This knowledge will support with the development of the grid method.</p> 	<div>division</div> <p>Children will develop their understanding of division and use jottings to support calculation</p> <p><b>Sharing equally</b></p> <p>6 sweets shared between 2 people, how many do they each get?</p>  <p><b>Grouping or repeated subtraction</b></p> <p>There are 6 sweets, how many people can have 2 sweets each?</p>  <p><b>Repeated subtraction using a number line or bead bar</b></p> <p><math>12 \div 3 = 4</math></p>   <p><small>The bead bar will help children with interpreting division calculations such as <math>10 \div 5</math> as 'how many 5s make 10?'</small></p> <p><b>Using symbols to stand for unknown numbers to complete equations using inverse operations</b></p> <p><math>\square \div 2 = 4</math>    <math>20 \div \triangle = 4</math>    <math>\square \div \triangle = 4</math></p>
----------	--	--	--	--

	addition	subtraction	multiplication	division
Y E A R  I T E M	<p><b>Empty number lines</b></p> <p>Children will continue to use empty number lines with increasingly large numbers, including compensation where appropriate.</p> <p>✓ <b>Count on from the largest number</b> irrespective of the order of the calculation.</p>  <p>✓ <b>Compensation</b></p>  <p><b>Partitioning</b></p> <p>Children will begin to use informal pencil and paper methods (jottings) to support, record and explain partial mental methods building on existing mental strategies.</p> <p>Adding the least significant digits first</p> <div style="display: flex; justify-content: space-around;"> <div> <math display="block">\begin{array}{r} 67 \\ + 24 \\ \hline 11 \text{ (7 + 4)} \\ 80 \text{ (60 + 20)} \\ \hline 91 \end{array}</math> </div> <div> <math display="block">\begin{array}{r} 267 \\ + 85 \\ \hline 12 \text{ (7 + 5)} \\ 140 \text{ (60 + 80)} \\ \hline 200 \\ \hline 352 \end{array}</math> </div> </div>	<p><b>Number lines</b></p> <p>Children will continue to use empty number lines with increasingly large numbers.</p> <p>Children will begin to use informal pencil and paper methods (jottings).</p> <p><b>Partitioning and decomposition</b></p> <ul style="list-style-type: none"> <li>Partitioning - demonstrated using arrow cards</li> <li>Decomposition - base 10 materials</li> </ul> <p><b>NOTE</b> When solving the calculation <math>89 - 57</math>, children should know that 57 <b>does NOT EXIST AS AN AMOUNT</b> it is what you are subtracting from the other number. Therefore, when using base 10 materials, children would need to count out only the 89.</p> <div style="display: flex; justify-content: space-around;"> <math display="block">\begin{array}{r} 89 \\ - 57 \\ \hline \end{array}</math> <math display="block">\begin{array}{r} 80 + 9 \\ 50 + 7 \\ \hline 30 + 2 = 32 \end{array}</math> </div> <p>✓ <b>Begin to exchange</b></p> <div style="display: flex; align-items: center;"> <math display="block">\begin{array}{r} 71 \\ - 46 \\ \hline \end{array}</math> <div style="margin-left: 20px;"> <p>Step 1</p> <math display="block">\begin{array}{r} 70 + 1 \\ - 40 + 6 \\ \hline \end{array}</math> <p>Step 2</p> <math display="block">\begin{array}{r} 60 + 11 \\ - 40 + 6 \\ \hline 20 + 6 = 26 \end{array}</math> </div> <div style="margin-left: 20px; border: 1px solid black; padding: 2px; font-size: small;">             The calculation should be read as e.g. take 6 from 1.           </div> </div> <p>This would be recorded by the children as</p> $\begin{array}{r} 70 + 1 \\ - 40 + 6 \\ \hline 20 + 6 = 26 \end{array}$ <p>Where the numbers are involved in the calculation are close together or near to multiples of 10, 100 etc counting on using a number line should be used.</p> 	<p><b>Repeated addition</b></p> <p>Children will continue to use this:        4 times 6 is <math>6 + 6 + 6 + 6 = 24</math> or 4 lots of 6 or <math>6 \times 4</math>        Children should use number lines or bead bars to support their understanding.</p>   <p><b>Arrays</b></p> <p>Children should be able to model a multiplication calculation using an array. This knowledge will support with the development of the grid method.</p>  <p><math>9 \times 4 = 36</math></p> <p><b>Scaling</b></p> <p>e.g. Find a ribbon that is 4 times as long as the blue ribbon</p>  <p>✓ <b>Using symbols to stand for unknown numbers to complete equations using inverse operations</b></p> <div style="display: flex; justify-content: space-around;"> <math>\square \times 5 = 20</math> <math>3 \times \triangle = 18</math> </div> $\square \times \bigcirc = 32$ <p><b>Partitioning</b></p> $\begin{aligned} 38 \times 5 &= (30 \times 5) + (8 \times 5) \\ &= 150 + 40 \\ &= 190 \end{aligned}$ <p>Some may prefer <b>grid method</b> (see Year 4)</p>	<p>Ensure that the emphasis in Y3 is on grouping rather than sharing.</p> <p><b>Repeated subtraction</b></p> <p>Children will continue to use:</p> <p>✓ <b>using a number line</b></p> <p>Children will use an empty number line to support their calculation.</p> <p><math>24 \div 4 = 6</math></p>  <p>Children should also move onto calculations involving remainders.</p> <p><math>13 \div 4 = 3 + 1</math></p>  <p>✓ <b>Using symbols to stand for unknown numbers to complete equations using inverse operations</b></p> <div style="display: flex; justify-content: space-around;"> <math>26 \div 2 = \square</math> <math>24 \div \triangle = 12</math> </div> $\square \div 10 = 8$

	addition	subtraction	multiplication	division
YEAR 4	<p>✓ Consolidate Year 3 partitioning</p> <p><b>Carrying below the line</b> Introduce this method:</p> $\begin{array}{r} 625 \\ + 48 \\ \hline 673 \\ \downarrow \end{array}$ $\begin{array}{r} 783 \\ + 42 \\ \hline 825 \\ \downarrow \end{array}$ $\begin{array}{r} 367 \\ + 85 \\ \hline 452 \\ \downarrow \end{array}$	<p><b>Partitioning and decomposition</b></p> $\begin{array}{r} 754 \\ - 86 \\ \hline \end{array}$ <p>Step 1 <math>700 + 50 + 4</math>  <math display="block">\begin{array}{r} 700 + 50 + 4 \\ - 80 + 6 \\ \hline \end{array}</math></p> <p>Step 2 <math>700 + 40 + 14</math> (adjust from T to U)  <math display="block">\begin{array}{r} 700 + 40 + 14 \\ - 80 + 6 \\ \hline \end{array}</math></p> <p>Step 3 <math>600 + 140 + 14</math> (adjust from H to T)  <math display="block">\begin{array}{r} 600 + 140 + 14 \\ - 80 + 6 \\ \hline 600 + 60 + 8 = 668 \end{array}</math></p> <p>This would be recorded by the children as</p> $\begin{array}{r} 600 + 140 + 14 \\ - 80 + 6 \\ \hline 600 + 60 + 8 = 668 \end{array}$	<p><b>Arrays</b> Children will continue to use arrays where appropriate leading into the grid method of multiplication.</p>  <p><math>(6 \times 10) + (6 \times 4)</math>  <math>60 + 24</math>  <math>84</math></p>	<p><b>Repeated subtraction</b> Children will develop their use of repeated subtraction to be able to subtract multiples of the divisor. Initially, these should be multiples of 10s, 5s, 2s and 1s – numbers with which the children are more familiar.</p>  <p>Then onto the vertical method:</p>
	<p>Using similar methods, children will:</p> <ul style="list-style-type: none"> <li>✓ add several numbers with different numbers of digits;</li> <li>✓ begin to add two or more three-digit sums of money, with or without adjustment from the pence to the pounds;</li> <li>✓ know that the decimal points should line up under each other, particularly when adding or subtracting mixed amounts, e.g. £3.59 + 78p.</li> </ul>	<p><b>Decomposition</b></p> $\begin{array}{r} 6141 \\ - 784 \\ \hline 668 \end{array}$ <p>Children should:</p> <ul style="list-style-type: none"> <li>✓ be able to subtract numbers with different numbers of digits;</li> <li>✓ using this method, children should also begin to find the difference between two three-digit sums of money, with or without 'adjustment' from the pence to the pounds;</li> <li>✓ know that decimal points should line up under each other.</li> </ul> $\begin{array}{r} \text{£}8.95 \\ - \text{£}4.38 \\ \hline \end{array}$ <p>leading to</p> $\begin{array}{r} 8 + 0.9 + 0.05 \\ - 4 + 0.3 + 0.08 \\ \hline 8 + 0.8 + 0.15 \quad \text{(adjust from T to U)} \\ - 4 + 0.3 + 0.08 \\ \hline 4 + 0.5 + 0.07 \\ \hline = \text{£}4.57 \end{array}$	<p><b>Grid method</b></p> <p><b>TU x U – Short multiplication</b></p> $\begin{array}{r} 23 \times 8 \\ \hline \end{array}$ <p>Children will approximate first  <math>23 \times 8</math> is approximately <math>25 \times 8 = 200</math></p> $\begin{array}{r} \times \quad 20 \quad 3 \\ 8 \quad 160 \quad 24 \\ \hline 160 \\ + 24 \\ \hline 184 \end{array}$	<p><b>Short division TU ÷ U</b> <b>Chunking method</b></p> $72 \div 3$  <p>Leading to subtraction of other multiples.</p> $96 \div 6$  <p>Any remainders should be shown as integers, i.e. 14 remainder 2 or 14 r 2.</p> <p>Children need to be able to decide what to do after division and round up or down accordingly. They should make sensible decisions about rounding up or down after division.</p>

	addition	subtraction	multiplication	division
YEAR FIVE	<p><b>Carrying method</b></p> <p>Children should extend the carrying method to numbers with at least four digits.</p> $\begin{array}{r} 587 \\ + 475 \\ \hline 1062 \\ 11 \end{array}$ $\begin{array}{r} 3587 \\ + 675 \\ \hline 4262 \\ 111 \end{array}$ <p>Using similar methods, children will:</p> <ul style="list-style-type: none"> <li>✓ add several numbers with different numbers of digits;</li> <li>✓ begin to add two or more decimal fractions with up to three digits and the same number of decimal places;</li> <li>✓ know that decimal points should line up under each other, particularly when adding or subtracting mixed amounts, e.g. 3.2 m - 280 cm.</li> </ul>	<p><b>Partitioning and decomposition</b></p> <p>Step 1 <math>754 = 700 + 50 + 4</math>  <math>- 286 = -200 + 80 + 6</math></p> <p>Step 2 <math>700 + 40 + 14</math> (adjust from T to U)  <math>- 200 + 80 + 6</math></p> <p>Step 3 <math>600 + 140 + 14</math> (adjust from H to T)  <math>- 200 + 80 + 6</math>  <math>400 + 60 + 8 = 468</math></p> <p>This would be recorded by the children as</p> $\begin{array}{r} 600 + 140 + 14 \\ - 200 + 80 + 6 \\ \hline 400 + 60 + 8 = 468 \end{array}$ <p><b>Decomposition</b></p> $\begin{array}{r} 6141 \\ 784 \\ - 286 \\ \hline 468 \end{array}$ <p>Children should:</p> <ul style="list-style-type: none"> <li>✓ be able to subtract numbers with different numbers of digits;</li> <li>✓ begin to find the difference between two decimal fractions with up to three digits and the same number of decimal places;</li> </ul> <p>know that decimal points should line up under each other</p> <p>Where the numbers are involved in the calculation are close together or near to multiples of 10, 100 etc counting on using a number line should be used.</p> <p>1209 - 388 = 821</p>	<p><b>Grid and column methods</b></p> <p><b>HTU x U - Short multiplication</b></p> <p><b>Grid</b></p> <p>346 x 9</p> <p>Children will approximate first  346 x 9 is approximately 350 x 10 = 3500</p> $\begin{array}{r} \times \quad 300 \quad 40 \quad 6 \\ 9 \quad \boxed{2700} \quad \boxed{360} \quad \boxed{54} \end{array}$ $\begin{array}{r} 2700 \\ + 360 \\ + 54 \\ \hline 3114 \end{array}$ <p><b>TU x TU - Long multiplication</b></p> <p><b>Grid</b></p> <p>72 x 38</p> <p>Children will approximate first  72 x 38 is approximately 70 x 40 = 2800</p> $\begin{array}{r} \times \quad 70 \quad 2 \\ 30 \quad \boxed{2100} \quad \boxed{60} \\ 8 \quad \boxed{560} \quad \boxed{16} \end{array}$ $\begin{array}{r} 2100 \\ + 560 \\ + 60 \\ + 16 \\ \hline 2736 \end{array}$ <p><b>Decimals</b></p> <p>Using similar methods, they will be able to multiply decimals with one decimal place by a single digit number, approximating first. They should know that the decimal points line up under each other.</p> <p>e.g. 4.9 x 3</p> <p>Children will approximate first  4.9 x 3 is approximately 5 x 3 = 15</p> $\begin{array}{r} \times \quad 4 \quad 0.9 \\ 3 \quad \boxed{12} \quad \boxed{2.7} \end{array}$ $\begin{array}{r} 12 \\ + 2.7 \\ \hline 14.7 \end{array}$ <p><b>Column methods (long and short)</b></p> <p>Extend these to column methods when ready:</p> $\begin{array}{r} 38 \\ \times 7 \\ \hline 266 \\ 5 \end{array}$ $\begin{array}{r} 56 \\ \times 27 \\ \hline 1000 \\ 120 \\ 350 \\ \hline 1512 \\ 1 \end{array}$ $\begin{array}{r} 56 \\ \times 27 \\ \hline 1120 \\ 392 \\ \hline 1512 \\ 1 \end{array}$	<p><b>Short division HTU ÷ U</b></p> <p><b>Chunking method</b></p> <p>Children will continue to use written methods to solve short division TU ÷ U.</p> <p>Children can start to subtract larger multiples of the divisor, e.g. 30x</p> <p>196 ÷ 6</p> $\begin{array}{r} 32 \text{ r } 4 \\ 6 \overline{) 196} \\ \underline{- 180} \phantom{0} \\ 16 \phantom{0} \\ \underline{- 12} \phantom{0} \\ 4 \phantom{0} \end{array}$ <p>Answer: 32 remainder 4 or 32 r 4</p> <p>Any remainders should be shown as integers, i.e. 14 remainder 2 or 14 r 2.</p> <p>Children need to be able to decide what to do after division and round up or down accordingly. They should make sensible decisions about rounding up or down after division.</p> <p><b>Short compact method</b></p> <p>Also a can be taught:</p> $\begin{array}{r} 97 \\ 3 \overline{) 2921} \end{array}$
